

I am distressed about your recent proposal to give low power FM priority over FM Translator service. My wife and I currently listen to the nationally broadcast station K-LOVE. I understand that this proposal could endanger the programming my wife and I enjoy so much right now. I believe that K-LOVE is an important service to both my family and our community, providing positive music and programming that encourages those who listen to it and endorses morals and beliefs that my wife and I endorse. I think it would be a detriment to our community and all the areas that currently receive K-LOVE if LPFM were to displace it.
